We absolutely loved the Early Engineers this last school year! My son really looked forward to his class each week. Not only was it fun, it was educational as well.

Grades 4-6: 2:10-3:10 PM
Instruction Mode: Online via Zoom.us (All supplies required for these classes will be mailed home at no charge)

Enrollment Options

About the program:

a) Curriculum and Supplies:

Our Early Engineers program is one of the most popular enrichment programs at William Land Elementary for several years now. Our curriculum includes several building projects using Legos and K'nex blocks. We learn an engineering word each week and build a project that is centered around that word. All the supplies your child would need for these projects will be provided by us at no cost to you and will be delivered to your home.

b) Instruction Mode:

Classes are all conducted online via tools like Zoom. We have been conducting these virtual classes for the past 6+ months now, and our staff is very well trained on conducting these virtual classes. For security, the Zoom links will be published via email a couple of days before the classes start. Our online classes have a very low teacher-student ratio of only about 1:10

c) Act fast!!

Classes start on October 5, but if you have signed up with us in the past, you know that our classes fill up very fast. Also, these Early Engineer sessions are specific to William Land only, and the price is a special price offered to your school only. So please do take advantage of this offer at your earliest availability.

Here is how to enroll:

- a) Online enrollment at: <http://bit.ly/WilliamLandAfterSchool>
- b) Call our office at 916-419-7644
- c) Email us at hello@dreamclasses.org and give us your call-back number. We will call you as soon as we read the message.
